UID EX 5 – Online Shopping Application

NAME: ASHIKA R

ROLLNO: 240701054

1. Task Analysis

Task Analysis is the process of breaking down how a user interacts with the online shopping app to complete a purchase. It helps in understanding user behavior, identifying difficulties, and improving the system design. **Key Aspects of Task Analysis:**

- Identify what users want to achieve (e.g., buying a product).
- Break the process into small steps.
- Analyze possible errors or confusion.
- Improve user experience.

2. User Flow

User Flow shows how the user moves from one screen to another to complete a goal.

User Flow for Online Shopping App

Start → Open App → Login/Register → Home Page → Browse Categories → Search Product → View Product Details → Add to Cart → Open Cart → Review Cart → Proceed to Checkout → Enter Shipping Address → Select Payment Method → Place Order → Order Confirmation → Track Order
